

# Art Of Light

## Fine Art - Long Exposure Photography Workshops

### SOUTH GREECE FINE ART WORKSHOP "ELEFSINA, RIO-ANTIRIO BRIDGE, MESOLONGI"

#### **WORKSHOP DESCRIPTION**

This workshop consists of extensive shooting at diverse locations of southern Greece and an editing session, so the participants will be able to learn how pro-quality fine art images are made from start to finish. It takes place at the southern part of Greece and offers a diverse range of subjects and locations.

We will visit a remote shore where one of Greece's most iconic shipwrecks rests, the "Mediterranean Sky". It was a cruiser ship that now rests at a peaceful bay. A beautiful subject to shoot.

The "Mesolongi" lagoon is one of the biggest and most important national parks of Greece. It comprises of widespread wetlands, swamps and lagoons. There is an abundance of photographic subjects such as fishing boats, jetties, fishing huts, light houses, fauna and more.

Part of the visited locations will also be the impressive suspended bridge of Rio. It is one of the world's longest cable-stayed bridges and is frequently favored by architecture photographers around the world. This bridge provides many alternative themes and will satisfy the photographer due to its grandeur.

The itinerary will be flexible in order to make the most out of each location and take advantage of the current weather conditions. On the last day of the workshop, an extensive editing session will take place at which the participants will be able to see how a fine art image is made, from RAW conversion to a finished work.

#### **Why book with Art Of Light**

Unlike many other workshops, this one is not a photo trip, it is a workshop suitable for the photographer that wants to delve into fine art photography and hone his/hers skills of creating fine art images, from personal vision, to subject selection, capturing techniques and post processing.

#### **The instructor:**

**Teo Kefalopoulos** is a fine art photographer based in Alexandria, Greece. For the past few years, he became strongly related to black and white fine art photography as he considers this art to be a creative process that leads to alternative views on ordinary scenes. By using the long exposure technique and introvert post processing, he applies a dramatic approach to scenes that few would otherwise notice and give value. While selectively participating in various international exhibitions in Greece and abroad, he mainly emphasizes on making photographic works and prints for decoration purposes. He is represented by a fine art gallery in the US and Germany. He is a member of the Royal Photographic Society with the distinction of Associate in Fine Art (ARPS). His works have been featured through numerous interviews and he runs webinars in Greece and abroad. For more information please visit [www.teokefalopoulos.com](http://www.teokefalopoulos.com)

#### **What you will learn:**

- ✓ Effectively use your camera & lens settings to achieve the correct exposure and depth of field.
- ✓ Calculate exposure times using ND filters and the high ISO rule.
- ✓ Personal vision, expression and composition in a frame.
- ✓ Subject selection by minimal and fine art standards.
- ✓ Evaluate the quality of cast light.
- ✓ Take advantage of the wind in a long exposure capture.
- ✓ Multiple captures and segmented frame capturing.
- ✓ Find solutions to exposure problems that might occur during a long exposure capture.
- ✓ Attend a fully featured fine art editing session.

#### **Essential equipment:**

- Any camera (DSLR/Mirrorless) that supports BULB mode and can record RAW files.
- Lenses: they should be able to handle wide-angle, middle and tele focal lengths.
- Neutral Density filters: preferably 10 stops or more.
- Remote shutter release unit (cable or wireless).
- Sturdy tripod, mounting head and plate.
- Spare batteries and memory cards.

**Optional equipment:** Rubber boots, raincoat, umbrella, lens cleaning kit, pen & notepad. You are also advised to bring your laptop during the post processing session (preferably with Photoshop installed).

**Experience level in photography:** beginner to advanced.

**Physical condition level:** Easy but personal safety always comes first.

#### **DETAILED WORKSHOP ITINERARY:**

**On the day before the workshop:** We will meet in Athens, at the hotel foyer at 18:00. We will have a chance to meet each other and discuss the necessary details of the itinerary.

**Day 1 (Athens – Elefsina – Antirio – Mesolongi):** We will meet in front of the hotel at 07:30, ready to load all of our luggage and equipment in the SUV. After a 1-hour drive, we will reach the location where the impressive “Mediterranean Sky” shipwreck rests. By completing our shooting there, we will then continue to the Rio-Antirio bridge that will require a 2-hours trip. An intermediate stop for lunch and coffee will be provided. We will visit the northern part of the bridge which provides the best views and possible frames of this construction. Ending the day, we will reach the hotel in Mesolongi where we will spend the night. A night stroll at the center of Mesolongi city is also a good option.

**Day 2 (Mesolongi – Kleisova – Tourlida - Athens):** We will spend the day shooting at various locations around the Mesolongi lagoon, including the bay of Kleisova and the Tourlida lagoon. Even though there is a multitude of subjects, all of them are located close to each other, so a full day of shooting will suffice to cover all locations. There will be intermediate stops for lunch and coffee. We will return to the hotel in Athens at dusk to rest and get prepared for the next day. You are advised to make a review and select some of your photos for editing.

**Day 3 (post processing session):** We will meet at 09:00 at the hotel’s lobby in Athens where the post processing session will take place. You are advised to bring your laptop, preferably with Photoshop installed. You will learn all parts of the editing process, from RAW conversion to preparing the image for printing. You are also advised to bring a notepad as you might need to keep notes of some parts of the editing process. End of the post processing session at 14:00. Please have in mind that you will have at your disposal a 1-hour online course at any time after the workshop for free.

\*During your return at the hotel at the end of each day, do remember to back up your memory card(s) to an external drive and charge the batteries. Since some locations are quite remote or some long trips will be required, you are advised to bring some water and snacks with you.

**WORKSHOP COST:**

Private workshop: € 1550

Two participants: € 1150€/participant

Three participants: € 930/participant

A 20% deposit is required for booking at least 2 months before the workshop starts. Full payment should be completed 1 week before the workshop starts. Payment may be completed via PayPal or bank wire transfer.

**Refund policy and disclaimer:**

Should you need to cancel your participation for any reason, it is mandatory to send a cancellation note via e-mail. In such a case, please read the terms below:

- 80% of the paid amount will be refunded when cancelling within 2 weeks before the workshop starts.
- Any related fees (booked accommodation, taxes, PayPal transactions, etc.), will be deducted from the refund.

The instructor is not responsible for cancelling parts of the workshop due to extreme weather conditions or for changing the itinerary due to unforeseen reasons.

**What is included in the price:**

Daily commute to the shooting locations, hotel accommodation for 3 nights, breakfast, multiple location shooting, post processing session and a 1-hour online course which comes free of charge.

**What is not included in the price:**

Transfer to and from Athens airport, meals and travel insurance.
